Color Curls

Create simply stunning designs with **Qualatex® Decor Shapes**. Designed to be **tied or taped together**, these versatile balloons are easy to use and can create a variety of unique decor elements.

Basic Inflation

The inflation technique for Taper and Starpoint Decor Shapes is similar to that of any Microfoil® balloon. Simply inflate with a foil regulator or air inflator and you're ready to start decorating.

Taping Technique

1. Line up the top point of one inflated Decor Shape with the bottom point of the other, and overlap the excess foil that creates the pointed ends.
2. Place a small piece of clear packaging tape on either side of the overlapping points so one balloon is taped to another.
3. Repeat Steps 1-2 with additional Shapes as needed.
4. To hang from the ceiling, tightly tie a piece of monofilament to the top point of the balloon.

Tying Technique

1. Tie the necks (or points) of two inflated Decor Shapes together tightly. Repeat with additional Shapes as needed.
2. Arrange the Tapers or Starpoints to create the desired design, such as a Column or Topiary.
